The Centers for Medicare & Medicaid Services (CMS) just released proposed changes to the 2016 nursing home regulations. The stated purpose of these changes is to reduce the burden on providers. At the same time, CMS issued its final rule on nursing home arbitration agreements, which has a goal to “achieve a better balance between the advantages and disadvantages” of pre-dispute arbitration for residents and providers.

CMS Releases Latest List of Special Focus Facilities and Candidates

The Centers for Medicare & Medicaid Services (CMS) has released the latest list of Special Focus Facilities (SFF) and candidates (July 24, 2019). Currently, 88 nursing facilities are designated as SFFs, and more than 400 additional facilities are considered candidates for the SFF list, meaning they meet the eligibility criteria for the program. To be considered for the SFF program, a facility must have a history (at least 3 years) of serious quality issues. These nursing facilities generally have more deficiencies than the average facility, and more serious problems such as harm or injury to residents.

Special Focus Facilities have more frequent surveys and are subject to progressive enforcement until it either graduates from the program or is terminated from Medicare and/or Medicaid.

CMS updates the list monthly.

Share How You Stand for Quality

Residents' Rights Month is all about celebrating the rights of residents living in long-term care facilities. It's a time to focus on all the ways the long-term care community - residents, family members, staff members, and advocates - can work together to stand for quality.
