USE CAUTION WITH ADULT BED RAILS

155 deaths: 93% rail entrapment
Most victims were 60 and older.

531 deaths:
Patients caught, trapped, entangled or strangled in hospital bed rails.
Most patients were frail, elderly and confused.

- Consider if a bed rail is right for the patient or your loved one.
- Make sure bed rail is properly installed.
- Check daily for rail slippage and gaps, which can cause entrapment.
