

## **William Joseph Cobb**

My dad and I were separated for 205 days and were reunited on October 2, 2020. I tested for COVID every two weeks and took all precautions necessary to see my dad until he passed on February 4, 2021.

The first picture was taken December 17, 2020 after cataracts surgery. The second picture was taken January 27 in hospice after being hospitalized for COVID after being exposed by a staff member in East Texas on January 13.
